## EMT ELECTRICAL METALLIC TUBING

### Description:

**Calconduit Electrical Metallic Tubing (EMT)** provides superior wire and cable protection in a variety of applications and environments. Due to its lightweight material, our EMT conduit allows for easy installation and field bending, resulting in reduced labor costs. All Calconduit EMT products undergo a series of QA/QC procedures, ensuring quality performance with smooth, problem free pulling.

### Features:

- Hot Dipped Galvanized
- Interior zinc coating
- Smooth interior for easy wire pulling
- Sizes available are 1/2" to 4"

### Standards:

Calconduit Electrical Metallic Tubing – EMT is rigorously tested to UL standards for bending characteristics, cold bending and corrosion resistant zinc coating in accordance with UL 797.

### UL Listings and Compliances:

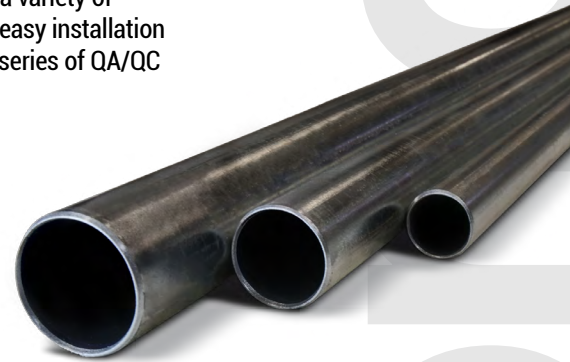

- Calconduit Electrical Metallic Tubing – EMT is UL/cUL listed in accordance to UL797 & ANSI C80.3 Standards
- UL File Number E315441
